

Meeting the Needs of the COPD Patient including End of Life Care

12th April 2010

- 1 day study event
- Certificate of Attendance
- Cost £99
- Venue - Wildern School, Wildern Lane, Hedge End, Southampton SO30 4EJ

Estimated smoking rates are above the England average in Southampton, with almost one in three adults smoking* 'Invisible Lives' BLF 2007

The day will cover:

- Domiciliary oxygen therapy
- Pulmonary rehabilitation
- Smoking cessation
- Psychological impact
- Palliative care

COPD is incurable, but with early diagnosis and the right care, the progression of the disease can be slowed down. The most important factor in this is smoking cessation.

Pulmonary rehabilitation has been shown to reduce dependence on health services, with people needing fewer GP consultations and hospital admissions after completing a course - BLF Invisible Lives

For application forms, please contact Gill Butler on 0151 529 6254 or e-mail REUK
